ABOUT US

Since 1973, Daily Thermetrics has provided the process industries with precise temperature measurement instrumentation. Whether it be for heaters and furnaces or catalytic reactor applications, Daily Thermetrics' Field Services Division has the experience and expertise to fully install or act in a supervisory role for your thermometry upgrade or changeout. Daily Thermetrics employs an entire division specializing in turnkey installations of temperature instrumentation specific to reactors and heaters/furnaces.

FIELD TEAM ROLES

- **Project Manager** Oversee day to day work, documentation and safety material
- **Technicians** Demo, general labor, field bends, live temperature monitoring, and local wiring/hardware
- **Welders** Prep weld locations and weld new tubeskins to pipes
- **Inspector** Perform NDT (PMI and PT) on weld locations
